Summary

- **5 years of experience** in Sydney as **front-end developer** and **full-stack developer** with a demonstrated history of working in the **website development and content management systems – Optimizely (EpiServer) and Sitecore**
- **5 years of experience** in **Vue.js, React.js, jQuery, Node.js, JavaScript (ES6) / TypeScript and Tailwind** with **demonstrated commercial projects in the distributor of health care, banking, public energy sector and NSW Non-Profit-Organisation.**
- **5 years of experience of designing and implementing .NET Core/.NET C# applications** using MVC architecture, including model design, controller logic, and SQL Server database management on the server side. Built and consumed **RESTful APIs** for scalable backend services in Optimizely.
- Built enterprise websites on Optimizely CMS using TypeScript, applying typed component contracts and shared block patterns to keep the front-end codebase maintainable.
- Developed dynamic and nested front-end interfaces using **Vue**, such as forms, work flow and dashboard. Leveraging reactivity fundamentals, computed properties, conditional rendering, and building both SPA and SSR solutions.
- Delivered UI features with React, utilizing hooks, Redux for state management, React Router, and a component - driven development approach.
- Created and maintained component libraries using **Storybook**, enabling UI documentation, visual testing, and rapid prototyping across React and Vue projects. Using JSON server to mock backend API data flow.
- Scaffolded with vite and managed dependencies with NPM. integrated and optimized UI with RESTful APIs, and implemented CI/CD pipelines using Azure DevOps and bitbucket.
- Built responsive, accessible interfaces using Tailwind, SASS, and modern CSS modules, ensuring consistent design across devices and screen sizes.
- Experience as a **Scrum Master, facilitating Agile workflows, sprint planning, and team coordination**
- Strong collaboration skills, guiding cross-functional teams, **resolving technical challenges, and ensuring timely project delivery.**
- **Permanent Resident in Australia with unlimited working rights**

Employment History

Front-end Developer (Full time Role)

Sept. 2025 - July.2026

Orchard Marketing (Enero Group)

- Leveraged **LLM- powered development workflows** using tools such as **Claude** and **Microsoft Copilot** to accelerate UI implementation, improve code quality, and streamline documentation—reducing development turnaround time by **20–30%.**

Optimizely projects:

- Served as the front- end engineer delivering three flagship platforms for the Royal Agricultural Society (RAS) — the **Royal Easter Show website, Sydney Showground, and the Australasian Animal Registry (AAR)** — driving end- to - end UI architecture, component development, and .NET integration.
- **Acted as the full - stack engineer responsible for developing the Transmedic website, covering front -end implementation, 50% back - end development, and Optimizely CMS integration.**

Others:

- Developed a **kiosk- specific questionnaire** for the OFEV Conference, delivering the full front- end experience in Vue App and integrating with an existing SQL- based reporting workflow implemented by the back- end team; the digital form was completed by **100+ attendees** during the event.

- Produced EDM/email campaigns including: International Eucharistic Conference campaign email (HubSpot) and Lily campaign email (HTML table based layout + inline CSS)
- Tech Stacks: **Optimizely, HTML/CSS, React.js/Vue.js, Tailwind, TypeScript, Node.js,.Net 10, RESTful API,SQL server, CICD in Bitbucket, Jira, AWS E3,Azure, Kiosk, AEM, WCAG and SEO**

Front-end Developer (Full time Remote Contractor Role)

Aug.2024-July.2025

Western Power (via Infosys)

Optimizely Project – Design Conformance Review (DCR) Portal | Feb 2025 – Jul 2025

- Delivered core product experiences including **DCR workflows (checklists, detail pages, multi - file uploads, progress indicators)** translating Figma designs into production - ready components. And created various animations and interactive UI elements for the website.
- Provided technical and delivery leadership, overseeing debugging and **root - cause analysis, coordinating cross -team issue resolution**, and **leading stand -ups and stakeholder showcases** to maintain alignment and visibility.

Optimizely Project – Power Training Service (PTS) Portal | Aug 2024 – Feb 2025

Demo - <https://www.westernpower.com.au/products-services/training/home/>

- **Taking ownership of the entire frontend architecture on the project, responsible for designing, developing and maintaining the UI**, collaborating closely with back-end developer, business analysts and solution architect.
- Drove robust API integration, defining and aligning **REST API** contracts with back-end teams while applying full - stack expertise in **.NET Core, SQL Server, and CI/CD** to ensure reliable, high - performance communication
- Translating Figma designs into HTML/CSS/JS code in **Vue.js framework**, with **liquid and tailwind**, eg **course list, course instances, shopping cart, course detail page, course carousel and so on.**
- Tech Stacks: **Optimizely, HTML/CSS, Vue.js, Tailwind, TypeScript, Liquid, Node.js,.Net Core, RESTful API, SQL server, CICD in Bitbucket and Bamboo, Jira, Storybook, Azure**

Front-end Developer (Full Time)

Apr.2021- Jun.2024

Stockland, Sydney

Optimizely

- Delivering the new website and working on CMS migration from Sitecore to Optimizely.
- Scaled the website with company's brand uplift Strategy. Key deliverables including developing components such as **Event tab, banners, feature statement, static HTML file and product brochure.**

Sitecore

- Created components with **Sitecore templates, TFS, Blazor and Razor, Glass , Synthesis and CSS pre-processing platforms.**
- Maintained, developed and designed the new UI for **construction tracker** for all communities on a two-week basis, with HTML, CSS, JavaScript and React.js.
- Tech Stacks: **JavaScript, HTML, CSS Node.js,.Net framework, Azure, AWS, Sitecore,C#, jQuery,Bootstrap, React.js**

Education

Master of Technology, major in Software Engineering

Mar.2018 - Nov.2019

Federation University Australia

Achievements – GDP 6.188/7

Master of Arts

Sep.2015 - Nov.2016

The Chinese University of Hong Kong

Bachelor of Arts

Sep.2011 - Jun.2015

Tongji University
